

TERESA GAJEWSKA

PROFILE

Over the last four years I have worked in the web development company, where I cooperated with developers and I became familiar with their job. Some time ago, I decided to change my career path. I began by learning the fundamentals of front-end technologies, such as HTML, CSS, SCSS, and JavaScript. Over the last few months I have been creating the front-end layer of a variety of web pages for my current employer.

I am actively in search of new career opportunities as a web developer.
